

Chippewa Falls Water Treatment Plant

- In 2010 the City of Chippewa Falls hired Short Elliott & Hendrickson to design a Water Treatment Plant for the City's three West Well Field wells that indicated higher than normal contents of iron and manganese.
- The project, which utilizes a pressure filter with a "Green Sand" filter media, received a principal forgiveness of \$1,463,999 from the American Recovery and Reinvestment Act, an Environmental Protection Agency Grant and a low interest Safe Drinking Water Loan administered through the Wisconsin Department of Revenue.
